RESEARCH INTERESTS

My primary research focus the analysis of partial differential equations. In particular, I study spectral inequalities for Schrödinger operators, non-harmonic trigonometric polynomials, and their applications to control theory for heat equations and the observability of dispersive equations.

I also have strong interests in microlocal and semiclassical analysis.

EDUCATION

Université de Bordeaux *September 2022 - Present*
PhD candidate in Mathematics
Advisor: Philippe Jaming

China University of Geosciences, Wuhan *September 2019 - July 2022*
Master of Science in Mathematics
Advisor: Ming Wang

Harbin Institute of Technology *September 2012 - July 2016*
Bachelor of Science in Applied Physics

RESEARCH PAPERS

1. Chadi Saba Philippe Jaming, Karim Kellay and Yunlei Wang. On l^1-norms for non-harmonic trigonometric polynomials with sparse frequencies. *can be provided upon request*, 2024, submitted.
2. Yunlei Wang. Quantitative 2D propagation of smallness and control for 1D heat equations with power growth potentials. *arXiv:2403.07643*, 2024, submitted.
3. Philippe Jaming and Yunlei Wang. Null-controllability of the generalized Baouendi-Grushin heat like equations. *arXiv:2310.11215*, 2023, submitted.
4. Yunlei Wang and Ming Wang. Observability of dispersive equations from line segments on the torus. *Evolution Equations and Control Theory*, 13(3):925–949, 2024
5. Yunlei Wang and Ming Wang. Observability inequality at two time points for the kdv equation from measurable sets. *Journal of Mathematical Analysis and Applications*, 505(2):125643, 2022

RESEARCH TALKS

- Quantitative 2D propagation of smallness and spectral estimates for Schrödinger operators, Second Analysis Mathematica Conference, Budapest, 29 July-02 August, 2024.
- Spectral inequalities and their application to control of PDEs, MARGAUx PhD Days, Poitiers, 22 - 24 May 2023.

SEMINARS

- 1D spectral estimates and quantitative propagation of smallness in the plane, Groupe de Travail Analyse, Institut de Mathématiques de Bordeaux, 14 October, 2024.

CONFERENCES ATTENDED

- 2nd Analysis Mathematica Conference Rényi Institute, Budapest, Hungary 29 July - 02 August, 2024. (**Contributed talk**)
- International Congress of Mathematical Physics (ICMP), Strasbourg, 01 - 06 July, 2024.

- ICMP Young Researcher Symposium (YRS), Strasbourg, 28 - 29 June, 2024.
- Semiclapp: Semiclassical analysis and applications, Nice, 13 - 17 May, 2024. (**Poster**)
- Harmonic analysis, operator and function theory, and their applications, Bordeaux, 08 - 10 April, 2024.
- Workshop for young researchers in analysis and mathematical physics, LMU Munich, 09 - 11 October, 2023.
- Summer school on unique continuation and applications, Castro Urdiales, Cantabria, 03 - 07 July, 2023.
- Real analysis and geometry, CIRM, Marseille, 12 - 16 June, 2023.
- MARGAUx PhD Days, Poitiers, 22 - 24 May, 2023. (**Short talk**)

TEACHING

- Fall 2019, Real Analysis, China University of Geosciences (Wuhan), teaching asistant.
